

Origami Cone

This origami cone is really quick to make and very Useful! Make little cones out of origami paper and pop in a few treats, or use magazine paper or newspaper cut into squares to make popcorn containers. They look pretty decorating a table, too (like the Christmas-themed origami cones, right).

With your paper colour side down, fold in half vertically so that the open edges are along the right hand side, like a book.

Fold the bottom left corner up to meet the top right corner, along the dotted line, as shown.

It should look like this (left).

Now fold the corner down and over the last fold, along the dotted line.

Origami Cone - page 2

Your model should look like this.

Lift up the flap on the right hand side and fold down to the left as shown.

Flip over and do the same on the other side.

Open out your cone and it is ready to fill!

Here is a popcorn cone made from a square of magazine paper!
