

## Make a colourful windmill

It's easy to make this mini windmill.

### You will need:

1 Use the scissors to cut halfway into each side of the square of paper.

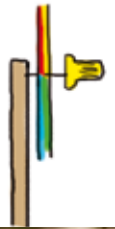

2 Fold each piece as in the photo. Then colour in your windmill.

3 Ask a grown-up to stick the pin through the middle of the windmill and into the stick.

**TIP**  
The drawing pin should not fix the paper too tightly to the stick. It should stay loose so that the windmill can turn easily when the wind catches its sails.

To make your windmill turn

hold it so that it faces into the wind or run with it.
