

Cow Finger Puppet

Cut two body shapes from white felt.

Cut two hooves from black felt.

Cut one head from white felt.

Cut one nose from pink felt.

Sew one set of the hooves to each body. Embroider a line of running stitch up the middle of each body to make the legs.

To make a tail, cut a short length of 6 strand embroidery thread and knot the end. Thread onto a needle and thread through the body so the knot is on the back and the thread hangs where the tail should be. Knot at the end and separate out until you are happy with the tail.

Sew the body pieces together making sure to leave the bottom open.

Cut patches of black felt and glue them to the body and head

Embroider two crosses on the nose as nostrils. Glue the wiggly eyes and nose to the face. And finally, glue the face onto the body.
