

Horse Finger Puppet

Cut two body shapes from felt.

Cut two hooves from black felt.

Sew one set of the hooves to each body.
Embroider a line of running stitch up the middle of each body to make the legs.

To make a tail, cut a short length of 6 strand embroidery thread and knot the end. Thread onto a needle and thread through the body so the knot is on the back and the thread hangs where the tail should be. Separate out the strands and repeat until you are happy with the tail.

Sew the body pieces together making sure to leave the bottom open.

Embroider two crosses on the face as nostrils.
Make the forelock the same way as the tail. Glue on wiggle eyes.

Glue some threads for the mane onto the front of the body. Glue on the face.
