

## Origami Cat - Part 2

Here are the instructions for a body to go with your cat  
By playing with the final few folds and varying them just a little you can achieve quite different effects.

You will need a glue stick or sticky tape to attach the head to the body.

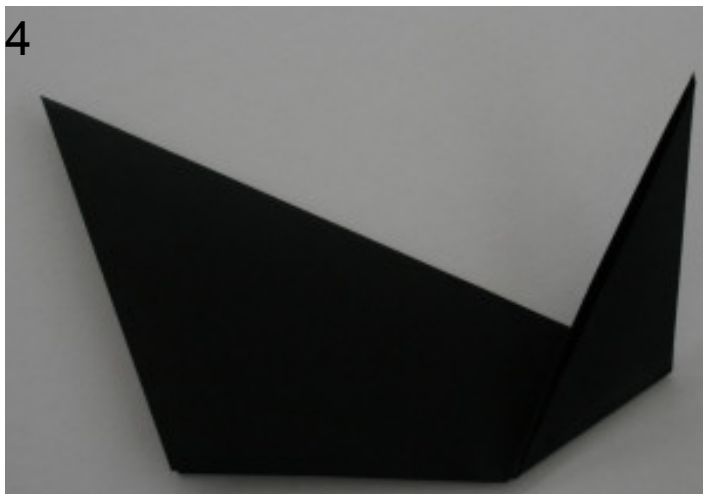

1 With coloured side down, fold your square in half along the diagonal, and crease.

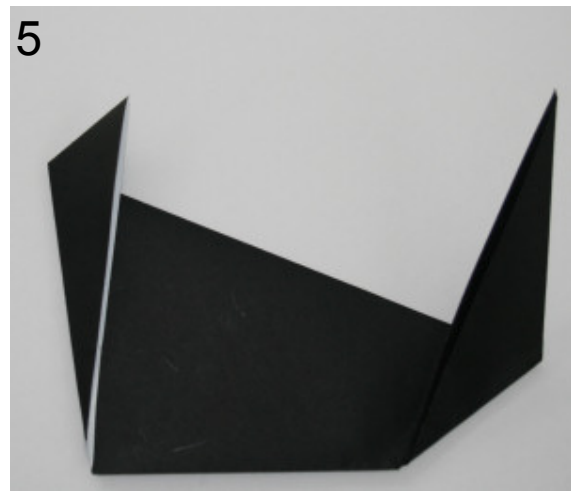

2 Bring two corners into the centre so that the edges meet the centre fold to form a kite shape, as shown.

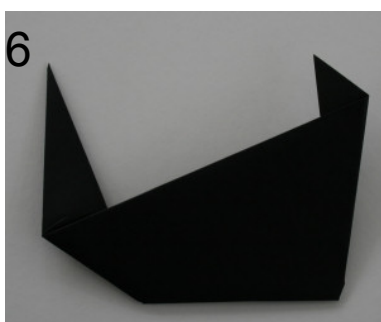

3 Fold in half along the crease.

4 Fold the thinnest point upwards at an angle to form the tail, as shown. Vary the angle to create the effect you want.

5 Now turn the left corner in to straighten the chest a little and form a "neck".

6 Flip over, and attach your head.
