

Origami Photo Frame (Square)

This little photo frame folds up in a flash, and is a cute way to display a small photo or present one as a gift.

If you attach a magnet to the back, they look great on the fridge!

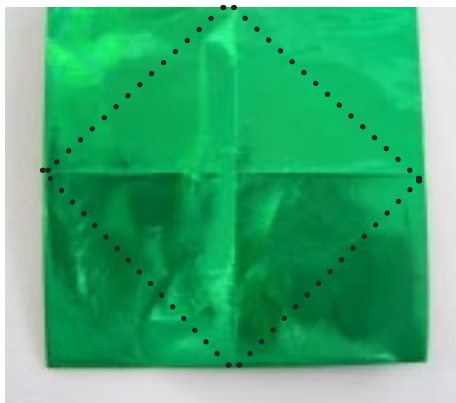

1. With the colored side down on the table, fold your square in half horizontally and vertically, creasing well. Open up again.

2. Now turn up the bottom edge and top edge about 1/4 of the way.

3. Turn in the side edges the same amount, and crease well.

4. Flip over. Fold each of the corners carefully into the centre, along the dotted lines.

5. Your model should look like this.

6. Flip over, and insert your photo!
