

TINKER BELL LANTERN

Make a Tinker Bell lantern out of a pumpkin this Halloween!

Cut out stencil

Outline with marker

Score carefully from pumpkin

YOU WILL NEED: ★ Black Marker ★ Tape ★ Spoon ★ Knife ★ Scissors

:: How to make your Tinker Bell lantern ::

Step 1:

Make a lid for your pumpkin. Cut a circle or a hexagon at least 5 inches in diameter around the pumpkin's stem. Make sure to cut out the lid at an angle (so that the outside edge is larger than the inside) to keep it from slipping inside.

Step 2:

When the lid is free, scrape the inside of the pumpkin and the lid clean of seeds and pulp with a large metal spoon.

Step 3:

Ask an adult to help you cut out the Tinker Bell stencil along the dotted lines.

Step 4:

Tape your stencil to the pumpkin. Trace around the inside edge of the Tinker Bell

template and stars with your marker. Remove the stencil and tape. You can move the stencil around to trace more stars around your pumpkin. Repeat until you are satisfied with the number of stars on your pumpkin.

Step 5:

Ask an adult to help you use pumpkin carving tools to scrape away and remove the outermost skin of pumpkin (about 1/4 inch deep) inside the outline of the Tinker Bell shape.

Step 6:

Place an LED candlelight inside your pumpkin, put on the lid, turn out the lights and enjoy the glow of your Tinker Bell lantern!
